# Web Technologies

Prepared by:

Gene Romuga

### **Lesson Overview**

### You will learn about ...

- Introduction to HTML
- HTML document structure
- Text elements
- Lists
- Image and Attribute
- Hyperlinks
- Table
- Structuring page

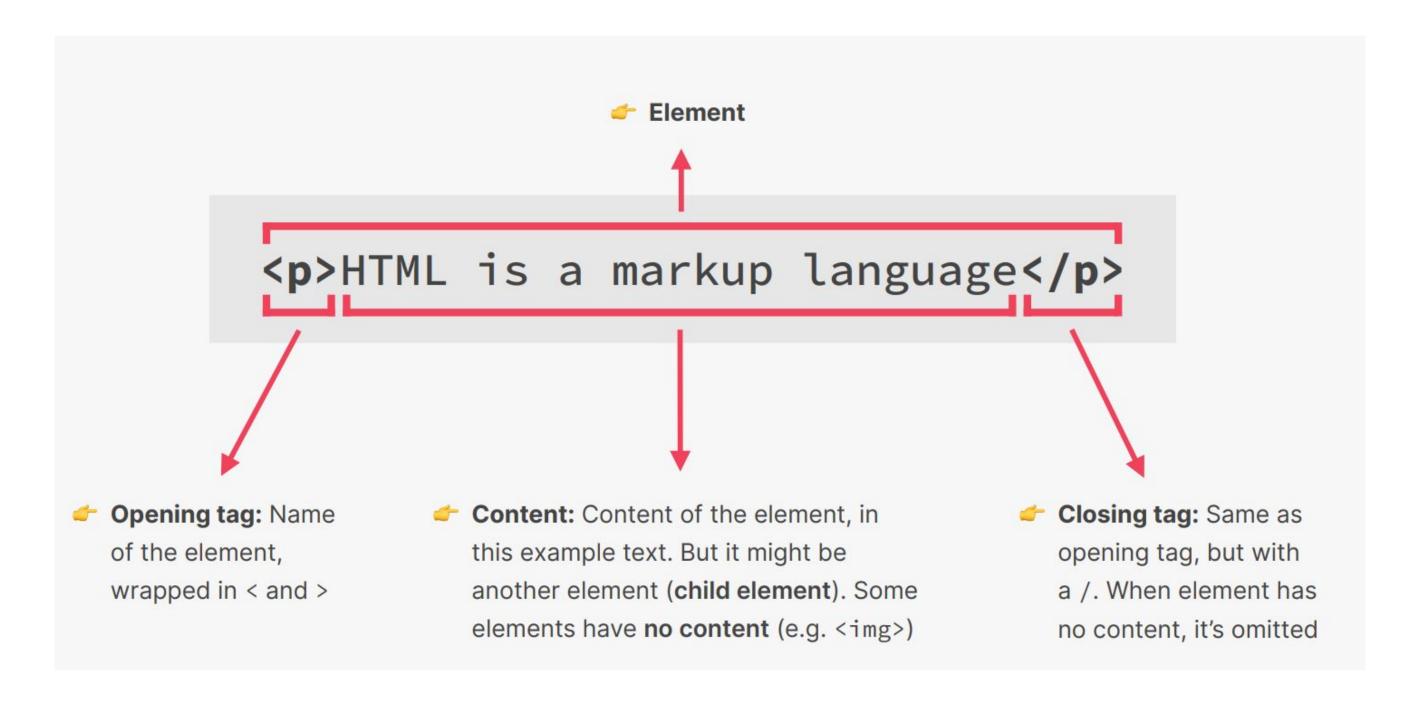

### What is HMTL?

- HyperText Markup Language
- HTML is a markup language that web developers use to structure and describe the content of a web page (not a programming language)
- HTML consists of elements that describe different types of content such as paragraphs, links, headings, images, videos, etc.

# Anatomy of an HTML element

### HTML Document Structure

- <!DOCTYPE html> defines that the document is an HTML5 document
- <head> root element of an HTML page
- <title> specifies the title of the HTML page
- <body> container of all visible elements like headings, paragraphs, images, etc

- Headings
  - It can be defined with <h1> to <h6> tags.
    - <h1>Hello</h1>
    - <h2>World</h2>
    - **.** . . .
    - <h6>Letran</h6>

- Paragraph
  - It always starts on a new line, and usually a block of text

This is a sample sentence.

- Comments
  - It doesn't display in the browser, but can be used to document your HTML source code.
    - <!-- Write your comments here-->

- Ordered List
  - It allows you to group a set of related items.
  - o Items will be marked with numbers.

```
    Dog
    Cat
    Lion
```

- Unordered List
  - It allows you to group a set of related items.
  - It will be marked with bullets.

```
ul>DogCatLion
```

# **Text Formatting**

- <b> Sold text
- <strong> Highlight important text
- <em> Emphasize important text
- <small> Smaller text
- <del> Delete text
- <sub> Subscript text
- <sup> Superscript text

# Image and Attribute

- It can be used to embed an image in a web page
  - <img src="url\_to\_img" alt="Description" width="500" height="200" />

# Hyperlinks

- <a> defines a hyperlink (anchor element)
  - <a href="url">Link text</a>
- Linked page will be displayed in the current browser window
- It enables world wide web

## **Table**

It consists of table cells inside rows and columns.

```
Name
Age
Course
Juan dela Cruz
18
IT
Joan Cruz
19
CS
```

# Structuring Page

- <nav> group navigation elements together
- header> group top part of a web document
- <article> group article elements together
- <aside> group second information of a page
- <footer> group footer elements together
